

Executive AI Accelerator Session

Service Factsheet

A Comprehensive AI Workshop for Executives

The Executive AI Accelerator Session offers key benefits including a comprehensive primer on AI, practical application insights, AI readiness assessment discussions, and a hands-on workshop with generative AI tools like ChatGPT. It is designed for senior management and aims to quickly bring them up to speed on AI's potential and practical uses within their organization. The session is structured to cover the latest in AI, explore AI applications relevant to the participants' industry, and provide actionable insights for organizational implementation.

The Session is highly interactive with sufficient room for discussion.

Key Benefits

From an Executive point of view, the benefits of the Executive AI Accelerator Session include gaining a strategic overview of AI technologies, understanding practical AI applications for your business or organization, learning about organizational AI readiness, and experiencing AI tools first-hand. This session equips leaders with the knowledge to drive AI initiatives, make informed decisions on AI investments, and leverage AI for competitive advantage.

Four Parts

The session itself is split up into 4 parts.

- **Latest in AI:** A quick primer on AI and its latest capabilities.
- **Exploring AI Applications:** We will cover a curated selection of AI applications relevant to the participants' industry or sector, including case studies of competitors. Dynaminds will perform a quickscan on relevant AI news, based on your organization, spotting relevant trends in the industry.
- **AI Readiness Assessment Outcome Discussion:** We will discuss the outcomes of the AI Readiness Assessments. We will highlight common themes, knowledge gaps, and areas of interest.
- **Practical Application with ChatGPT:** We will continue hands-on by applying AI in practice, where participants engage with ChatGPT (or similar generative AI tool) to explore a specific use case in the organization. We will cover tips and basic and more advanced prompting techniques on how to best interact with such tools.

AI Readiness Assessment

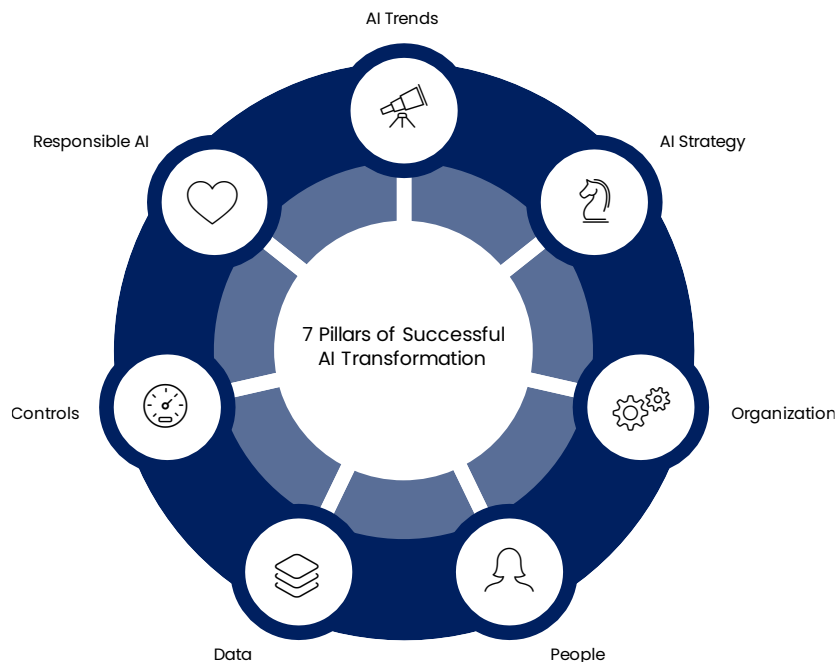

As input for the Session, your participants are invited to fill out the AI Readiness self-assessment and obtain their AI Readiness Report, which can be found on our website. We collect the inputs and present aggregate insights derived from this dataset during the Session. The self-assessment is based on the 7 Pillars of Successful AI Transformation framework by Dynaminds.

Practical Information

- Intended audience: Small team up to 8 people, senior management/executives/board members.
- Duration: 3 hours.
- Fixed fee: EUR 2500, excl. VAT.
- The session will be held at any location of your preference, in The Netherlands and Belgium.
- The session will be held in English or Dutch language.
- The Executive AI Briefing can be held during evenings, for example as part of an evening programme of your executive board offsite session.

Executive AI Accelerator Session compared to State of AI Workshops

The AI Accelerator Sessions can be regarded as a primer to AI and the session itself has a fixed agenda and scope. For a more in-depth and even more tailored discussion on AI, Dynaminds also offers workshops with a modular approach. Please refer to the website for more information about these Executive AI Workshops.

Dynaminds is a Netherlands-based AI consultancy company, focused on bridging the AI knowledge gap within organizations. The session is structured around the '7 Pillars of Successful AI Transformation Framework' (see top right figure). Our objective is to provide actionable insights and a roadmap for AI transformation aligning with your organization's vision. For a holistic scan where to apply in your organization, Dynaminds offers the AI Opportunity Scan service. Additionally, Dynaminds provides an 'AI Advisor to the Board' service, acting as a continuous driver of AI Transformation in your organization.

Give direction to your AI transformation journey.
